

MUHAMMAD RIYADH AZHAR

Network Engineer | FTTH & Infrastructure Specialist

Tangerang, Indonesia | +6289638855321 | mriyadhazhar@gmail.com | LinkedIn | GitHub

Enterprise Network Engineer with robust expertise in large-scale infrastructure management, Python-based network automation, and advanced connectivity troubleshooting. Proven track record in deploying and optimizing enterprise-grade hardware (Cisco Catalyst, Aruba, Huawei, MikroTik) and designing efficient physical architectures. Committed to ensuring network security, maintaining high uptime, and delivering stable IT service operations.

WORK EXPERIENCES

GMF Aeroasia (PT Garuda Maintenance Facility Aero Asia Tbk) – Tangerang, Indonesia

Network Support (April 2026 – Present)

- **Network Automation & Scripting:** Engineered Python-based network automation tools (documented on GitHub), including automated MRTG data scraping pipelines and Huawei WAC LLDP topology crawlers, significantly reducing manual reporting time and administrative overhead.
- **Infrastructure Monitoring & Access Control:** Administered health monitoring for 190+ hosts and 111+ Aruba/HP switches via LibreNMS and PRTG. Managed IoT network access by implementing strict MAC Filtering for security devices (CCTV, temperature sensors).
- **Physical Architecture & Diagnostics:** Prioritized Cat 6 cabling over Cat 8 to align with Aruba 2930 hardware port limitations, ensuring cost-efficient Gigabit throughput. Executed Layer 1 maintenance (LAN tracing, UTP cable termination/recrimping) and Layer 2 connectivity diagnostics to support high availability of core IT services (Azure AD, MDaemon, XOPS).
- **ITSM & Wireless Administration:** Utilized Jira for IT Service Management to track and resolve trouble tickets. Managed enterprise Wi-Fi infrastructure via Huawei WAC for AirEngine APs across multiple segmented SSIDs (GMF-VIP, Employee, Guest, Mobile), collaborating directly with ISP vendors to resolve downtimes.

Biznet (PT Supra Primatama Nusantara) – Bali, Indonesia

Network Operations Access Engineer (August 2024 – March 2026)

- **Installation & Activation:** Successfully executed an average of 10 FTTH installations per week using GPON technology, ensuring 100% compliance with company SOPs.
- **GPON Diagnostics & Resolution:** Conducted in-depth anomaly analysis on GPON physical fiber networks utilizing OTDR and OPM tools, delivering technical resolutions from core links to Customer Premises Equipment (CPE) to maintain a 90% first-visit resolution rate.
- **Device Configuration:** Configured and maintained CPE devices (ONTs and Access Points), reducing recurring configuration errors by 20% through standardized deployment procedures.
- **Customer Support:** Provided onsite and remote technical assistance, maintaining a customer satisfaction score (CSAT) of 4.5/5.

Freelance / Self-Employed – Bali, Indonesia

Network Engineer (June 2025 – March 2026)

- **Enterprise Deployment (Project Bank BCA):** Executed onsite network migration for 7 Bank BCA branches in Bali, deploying 28 Cisco Catalyst 9200L switches across critical segments (Aggregate, Operational, & ATM). Successfully migrated connectivity for 100+ endpoints during strict maintenance windows, ensuring 100% operational readiness for next-day business.
- **Network Optimization:** Designed and implemented mesh network solutions (TP-Link, Tenda, Ruijie) for 10+ residential villas, improving Wi-Fi coverage area by 50%.
- **Infrastructure Design:** Managed wired network setups using unmanaged switches to ensure stable connectivity for high-traffic home office environments.

Zenius (PT Zona Edukasi Nusantara) – Jakarta, Indonesia

Full Stack Developer Intern (February 2022 - July 2022)

- Collaborated in an agile cross-functional team to develop website features using React.js and Node.js, contributing to the timely deployment of 3+ core features used by end-users.
- Demonstrated adaptability and effective time management in a fast-paced tech environment, ensuring all sprint deliverables were met on time.

EDUCATION

UNIVERSITY OF JEMBER – Jember, Indonesia

Bachelor of Information Technology (Graduated 2024)

GPA: 3.47/4.00

Activities:
Kotlin Secretariat & IT Dev Public Relations at HIMATIF (2021), E-Sport Athlete (2019-2020).

CERTIFICATIONS

- **MikroTik Certified Network Associate (MTCNA)** – MikroTik (Mar 2026 – Mar 2029)
- **ACA Database Certification** – Alibaba Cloud (Nov 2024 – Nov 2026)
- **ACA Cloud Security Certification** – Alibaba Cloud (Oct 2024 – Oct 2026)
- **Exp: AWS Cloud Practitioner Essentials** – Dicoding Indonesia (Mar 2022 – Mar 2025)
- **Exp: Basic Azure Cloud** – Dicoding Indonesia (Feb 2020 – Feb 2023)

SKILLS

- **Networking & Infrastructure:** LAN/WLAN Administration, L1/L2 Troubleshooting, TCP/IP, Routing & Switching (VLAN, STP, OSPF, Static Routing), Network Cabling (UTP/Fiber).
- **Vendors & Hardware:** Aruba & HP Switches, Cisco Catalyst, Huawei AirEngine APs, Huawei WAC, MikroTik.
- **Monitoring & ITSM:** LibreNMS, PRTG Network Monitor, MRTG, Jira (Ticketing/Issue Tracking).
- **Automation & Development:** Python, Network Automation Pipelines, GitHub / Version Control.
- **OS & Systems:** Windows, macOS, Linux.
