

MUHAMMAD RIYADH AZHAR

Network Automation Engineer | Python & Infrastructure

Tangerang, Indonesia | +6289638855321 | mriyadhazhar@gmail.com | linkedin.com/in/mriazh/ | github.com/mriazh

Network Automation Engineer with 2+ years of experience in network and infrastructure operations, including recent work building Python automation for MRTG reporting, Huawei WAC LLDP topology discovery, and enterprise data extraction. Experienced in developing test-backed tools with GUI/CLI workflows, browser automation, SSH automation, OCR, Excel report generation, and secure environment-based configuration. Currently building toward AI-enabled automation for infrastructure and operational workflows.

WORK EXPERIENCE

GMF Aeroasia (PT Garuda Maintenance Facility Aero Asia Tbk) | Tangerang, Indonesia
Network Support (April 2026 – Present)

- **Workflow Automation & Scripting:** Engineered production-grade Python automation pipelines, including automated MRTG monthly data scraping and Huawei WAC LLDP topology crawlers, substantially reducing manual reporting effort and administrative overhead.
- **Infrastructure Monitoring & Observability:** Maintained operational telemetry across 190+ hosts and 111+ enterprise switches using LibreNMS and PRTG, proactively diagnosing Layer 2/3 bottlenecks to ensure high availability for core enterprise services.
- **Access Control & IoT Security:** Enforced strict MAC-filtering policies for enterprise IoT perimeters (CCTV and environmental sensors) and managed segmented multi-SSID wireless environments across Huawei AirEngine Access Points.

Biznet (PT Supra Primatama Nusantara) | Bali, Indonesia
Network Operations Access Engineer (August 2024 – March 2026)

- **Diagnostics & Root-Cause Analysis:** Executed end-to-end optical anomaly diagnostics on enterprise GPON networks using OTDR and OPM tools, sustaining a 90% first-visit resolution rate on complex link impairments.
- **Standardization & Deployment:** Standardized configuration procedures for Customer Premises Equipment (CPE) across high-density FTTH deployments, reducing recurring misconfiguration tickets by 20%.
- **Technical Client Escalation:** Provided technical troubleshooting and onsite infrastructure resolutions, consistently achieving a 4.5/5 Customer Satisfaction (CSAT) rating.

Freelance / Self-Employed | Bali, Indonesia
Network Engineer (June 2025 – March 2026)

- **Large-Scale Switch Migration:** Spearheaded the physical and logical migration of 28 Cisco Catalyst 9200L switches across 7 Bank BCA branches within strict maintenance windows, ensuring zero disruption to next-day financial operations.
- **Enterprise Mesh Optimization:** Designed and deployed multi-vendor mesh network topologies (Ruijie, TP-Link) for 10+ residential and commercial clients, expanding stable wireless coverage by 50%.

Zenius (PT Zona Edukasi Nusantara) | Jakarta, Indonesia
Full Stack Developer Intern (February 2022 - July 2022)

- **Full-Stack Web Development:** Collaborated in a fast-paced Agile sprint environment to build, test, and deploy 3+ core web features using React.js and Node.js for end-user learning platforms.
- **Code Reliability & Delivery:** Participated in code reviews and cross-functional team sprints, ensuring clean component architecture and timely feature releases.

PORTFOLIO

- **MRTG-TelkomCare-Report-Automation** | Python, PySide6, Selenium, OCR, OpenPyXL, PyInstaller, Pytest
Automated TelkomCare MRTG graph collection and monthly Excel report generation with GUI/CLI workflows, OCR support, packaging, and automated tests.
- **Automated-WAC-Huawei-Crawl-Data** | Python, Paramiko, PySide6, SSH Automation, Pytest, Hypothesis
Built an SSH-based crawler that collects LLDP data from Huawei WAC-managed APs and maps AP-to-switch connectivity into structured CSV output.

- **GMF-CMP-Automation** | Python, Playwright, IMAP, OpenPyXL, Pytest, Mypy, Ruff
Automates CMP portal login, IMAP-based OTP retrieval, product export, dashboard capture, and Excel report generation.

EDUCATION

UNIVERSITY OF JEMBER | Jember, Indonesia
Bachelor of Information Technology (Graduated 2024)
GPA: 3.47/4.00
Activities:
Kotlin Secretariat & IT Dev Public Relations at HIMATIF (2021), E-Sport Athlete (2019-2020).

CERTIFICATIONS

- **MikroTik Certified Network Associate (MTCNA)** – MikroTik (Mar 2026 – Mar 2029)
- **ACA Database Certification** – Alibaba Cloud (Nov 2024 – Nov 2026)
- **ACA Cloud Security Certification** – Alibaba Cloud (Oct 2024 – Oct 2026)
- **Exp: AWS Cloud Practitioner Essentials** – Dicoding Indonesia (Mar 2022 – Mar 2025)
- **Exp: Basic Azure Cloud** – Dicoding Indonesia (Feb 2020 – Feb 2023)

SKILLS

- **Programming & Automation:** Python, Playwright, Selenium, Paramiko, REST APIs, Git/GitHub, React.js, Node.js.
- **Data Processing & Testing:** OCR Pipelines, OpenPyXL, Pytest, Hypothesis, Mypy, Ruff.
- **Networking & Infrastructure:** TCP/IP, VLAN, STP, OSPF, Static Routing, LAN/WLAN, GPON, OTDR, OPM, UTP/Fiber Cabling.
- **Monitoring & Hardware Vendors:** LibreNMS, PRTG, MRTG, Cisco Catalyst, Aruba/HP, Huawei AirEngine/WAC, MikroTik.
- **Operating Systems:** Windows, Linux/Unix, macOS.
